<td>Expand and strengthen the network of external partnerships globally to advance the vision, mission, and strategic goals of the association.</td>
<td>Increase visibility of this Advising Community to members and potential members</td>
<td>Steps to Success:</td>
<td>Social media: post once weekly minimum. Attendance numbers at virtual events: Launch polls at virtual events to capture who is joining for the first time. Track number of attendees to then compare the attendance records for additional online events (GPS Talks)</td>
<td>Steer Committee initiatives all work towards this goal</td>
<td>Issue: Folks not having mental capacity to take on more work/responsibilities</td>
<td>We have increased our presence on LinkedIn. And one of the GPS Collaborative Groups (GPS x Doctoral Students) started their own LinkedIn to encourage members to communicate there instead of emailing. Overcoming: Just by being present and sharing this group, when professionals have the ability to take on more professional responsibility, our hope is that they remember this group and choose to become involved.</td>
<td>1. Based on a survey, members do prefer LinkedIn over FB and IG or a variety of other chat ways due to everyone having a different preference. We will continue to post engaging content and encourage folks to join the Listserv and LinkedIn at each communication and meeting.</td>
</tr>
<tr>
<td>1. Post weekly engaging social media content that highlights events and opportunities through GPS AC, NACADA, and relevant new articles</td>
<td>2. Send quarterly newsletters through the listserv highlighting relevant research articles, member spotlights, and member recognitions</td>
<td>3. Send monthly highlights to membership of upcoming GPS AC and NACADA events and deadlines through the listserv.</td>
<td>4. Encourage membership to forward on content, events, and emails that may be relevant to others in their department or institution</td>
<td>5. Closely track attendance at Social media: post once weekly minimum. Attendance numbers at virtual events: Launch polls at virtual events to capture who is joining for the first time. Track number of attendees to then compare the attendance records for additional online events (GPS Talks)</td>
<td></td>

Provide practices that allow members to identify and cultivate their long-term professional development and engagement with the association.

**Steps to Success:**

1. **Encourage membership to read proposals marked for this AC**
2. **Encourage collaboration between members for publications, conference presentations, and community engagement events**
3. **Encourage members to apply for NACADA, Regional, and campus awards, scholarships, and recognitions**

**Record the specific opportunities that are provided for members to participate in GPS and NACADA. Create a guide to send out at the beginning of each year letting membership know about these opportunities for involvement.**

**Track number of community members who were selected for awards, scholarships, and recognitions through NACADA. Once these numbers are reported, this can be the benchmark for future development.**

**Issue:** Folks unable to expand their resources for participation.

**Overcoming:** When folks can rejoin or become involved, they will have been informed of potential opportunities through our communications and can then jump in where and when they are ready.

1. **There were 8 GPS specific proposals submitted and many GPS community members who were proposal reviewers – several for the first time!**
2. **A collaborative excel was sent out, but less than 10 participated. However, at least two collaborations that I am a part of have been development for an AAT article and possible 2023 Annual Presentation**
3. **I do not have a tally, but in each newsletter (every other month) there has been folks that submitted**

**1. Work to track and document all opportunities throughout the year, not just at Annual.**

**2. GPS just launched the newest initiative “GPS Collaboratives”**. At this time, we have:

- **GPS x**
  - Adult Learners
  - International students
  - Doctoral students
  - Online learners

We have also collaborated with members of the Distance and Online AC, Faculty Advising.
Assess association practices to ensure relevance with the evolving landscape of higher education across the globe.

**Benchmark our roles and responsibilities within the community**

**Steps to Success:**
- Develop an outline for most helpful information to be collected.
- Reach out to others that have asked for roles, titles, and responsibilities this last year on the listserv.
- Mine and clean data to create a tool to share on the public GPS AC website for member use.

| Years | Using survey instruments such as survey tool (ensuring anonymity) for open-ended questions to collect data. Aiming to collect at least 20 responses. | Involvement of membership Approvals if publication is desired | Feedback from community is that this analysis is greatly needed. GPS Talk was held, and community provided feedback about the data they wish to be provided about those that work with graduate and professional students to enhance their understanding of the profession and to better advocate for their roles. Another member of community has released a general survey. AY 2022 Steering Committee Benchmarking Initiative will review results and find a jumping off point for a follow-up survey. |
