

## ECE Advising Office Abstract

---

The Electrical and Computer Engineering (ECE) Advising Office is a departmental office within the Cockrell School of Engineering. The ECE department is the largest department within the Cockrell School and is made up of 1600 undergraduate students. The ECE Advising Office fully embraces its mission of providing advice, services, and resources students may need to make informed decisions about their progress towards an Electrical and Computer Engineering degree. We pride ourselves in providing continuous support and encouragement that assists students in surpassing their own academic expectations. The ECE Advising Office is committed 100% to student success and has made student retention a top priority. Within the past few years, the ECE department has had a stellar record of 92% and above first-year student retention rates. These high retention rates are the outcome of the plethora of resources that were designed and geared towards student attainment in the ECE Advising Office. Resources and programs from the ECE Advising Office include: ECE Tutoring, MoveForward Program, ECE retention courses-“Enhancing Academic Success”, Course Demand Survey Project, ECE Canvas Advising, ECE Undergraduate Advisory Board, ECE High School Counselor’s Day, ECE outreach programs, ECE Peer Advisor and Peer Ambassador Program, and ECE First Year Interest Groups. In addition to providing resources, the ECE Advising Office promotes students’ participation in internships, research, and exploration of graduate school.
